# TECHNOLOGY & TRANSPARENCY IN SUPPLY CHAIN SOURCING

*Your ingredients plus everything buyer's need on a single screen, 24/7*

## QA/QC DOCS

Our in-house QC teams will audit all ingredient documents and certificates from each factory to ensure they meet our standards prior to listing them online. Each ingredient listing clearly displays all documentation in PDF form. This gives buyers what they need 24/7, so they can make quick decisions to purchase your ingredients.

## FACTORY OF ORIGIN

Consistent quality is as important as maintaining exceptional quality, and with FSMA, traceability is mandatory. Part of our quality control program includes keeping records of all approved factories of origin and clearly displaying this on each ingredient page, providing you with additional brand exposure.

## FACTORY DIRECT PRICING

Partnering directly with approved global factories allows for factory direct pricing set by each factory. Each ingredient listing displays tiered pricing based on volume and each factory partner sets their tiered pricing. High Volume offer allows you to receive bids directly from the buyer. You decide if you can meet their price request.

## U.S. INVENTORY

Every ingredient page clearly lists the real-time U.S. inventory in our CA, NJ and Miami warehouse locations. This allows buyers to choose the shipping warehouse, and if orders are placed before 2 p.m., they are shipped that day.

LICENSE FEE	SERVICE FEE	SECURITY DEPOSIT
\$1,000/year	15%	\$5,000

*\* Distributors must provide factory authorization and original factory documents.*
